Nova Labs Annual Report 2025

A fictional company report used as sample data for multimodal RAG practice.

1. Executive Summary

2025 was a strong year for Nova Labs. Revenue grew through the year and reached its peak in the third quarter, after the launch of Nova Agent. The number of monthly active users more than quadrupled between January and December. Figure 1 shows the quarterly revenue and Figure 2 shows user growth. The company ended the year with 42 employees and opened a second office in Singapore.

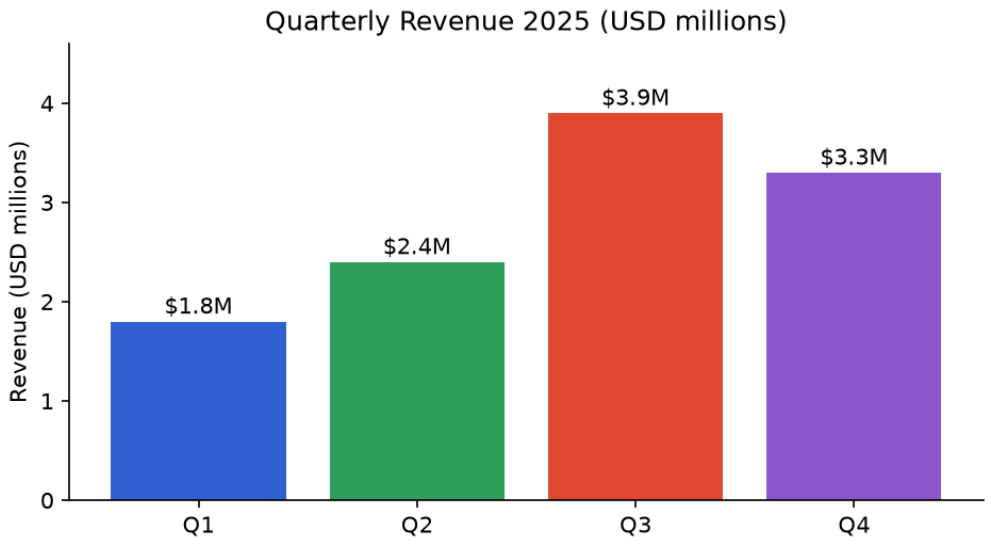

Figure 1: Quarterly revenue in 2025, in millions of US dollars.

Revenue rose sharply in the middle of the year because of two events: the Nova Agent launch in July, and a large partnership with a European telecom group. Revenue in the fourth quarter was lower than in the third quarter because several large customers moved their annual payments to the first quarter of 2026.

2. User Growth

User growth was slow in the first half of the year and accelerated after the Nova Agent launch. Figure 2 shows monthly active users for each month of 2025. Growth slowed slightly in November and December, which the product team links to the holiday season and to fewer new sign-ups from students.

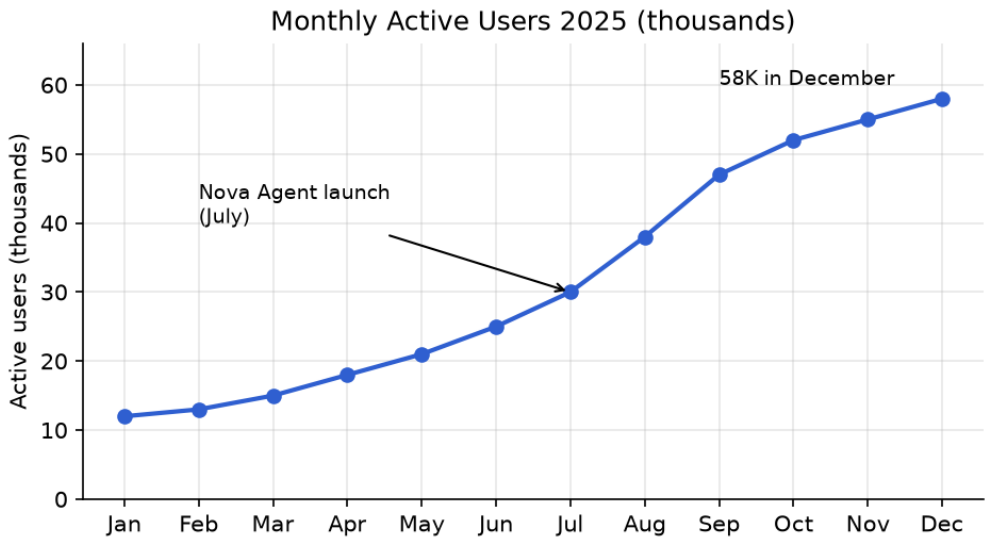

Figure 2: Monthly active users in 2025, in thousands.

3. Product Performance

Nova Search remains the largest product, followed by Nova Agent, which became the fastest-growing product in its first six months. Nova Notes is the newest product and has the smallest share. Figure 3 shows how total revenue was split between the three products.

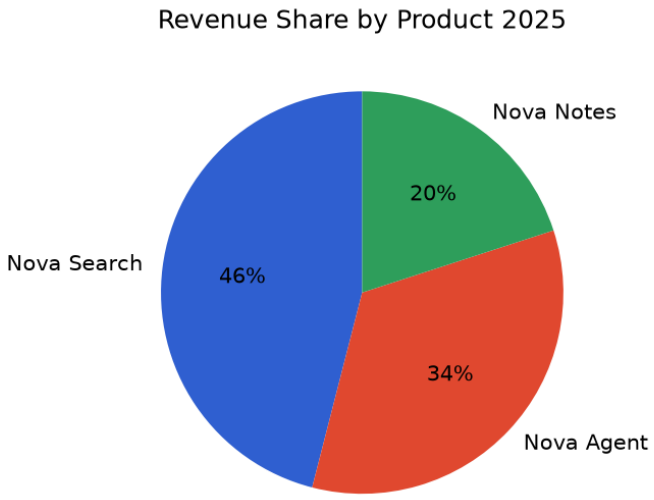

Figure 3: Share of total 2025 revenue by product.

4. Customers and Regions

Nova Labs serves customers in 38 countries. Europe is the largest market by revenue, followed by North America. Customer satisfaction is measured by a yearly survey on a scale from 1 to 5. Figure 4 compares the average score of the four main regions. The support team has set a goal of raising the score of the lowest region above 4.2 in 2026 by adding Spanish and Portuguese documentation.

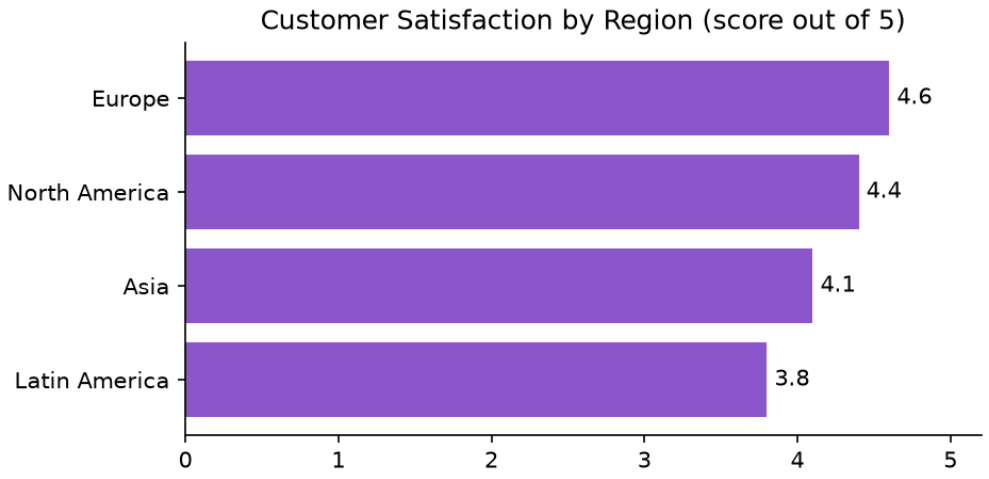

Figure 4: Average customer satisfaction score by region.

5. Key Figures

The table below summarizes the main numbers of the year. The table is plain text, while the charts above contain extra details that are not repeated here.

Metric	2024	2025
Employees	31	42
Countries served	27	38
Open-source GitHub stars	9,400	21,000
Support tickets resolved within 24 hours	81%	92%

6. Outlook for 2026

In 2026, Nova Labs plans to release Nova Agent 2.0 with support for images and tables, to open a customer support hub in Lisbon, and to double its open-source contributor base. The leadership team expects the partnership with the European telecom group to be renewed in the first quarter.
